

Custom Rubber Gaskets

Liangju Rubber specializes in precision custom rubber gaskets and seals for a wide range of applications and industries worldwide. A rubber gasket is a sealing product used to fill the space between two or more mating surfaces generally to prevent leakage (of air, chemicals, gases, or liquids) from or into the joined objects while under compression. Our main objective is to continuously exceed our customer's expectations by providing them with high-performance gaskets and sealing products, competitive pricing, on-time delivery, and exceptional customer service.

1. Product Introduction of the Custom Rubber Gaskets

A rubber gasket is a smart component that seals against both liquids and gases. They are the perfect solution to fill in irregularities and connect two surfaces together. The characteristics of a gasket are to be manipulable and able to warp into the tight space it is designed for. Custom Rubber gaskets and seals prevent seepage of moisture or air in a multitude of applications. Liangju Rubber is the source for custom rubber molding and manufactured rubber gaskets and rubber seals. No matter what application, Liangju Rubber has the experience to solve a variety of sealing problems. We provide a comprehensive line of commercial and specification grade elastomers to fabricate a variety of rubber parts including:

Rubber Gaskets

Rubber Seals

Rubber Washers

Materials and Specifications of Custom Rubber Gaskets

Between different part environments and performance needs, we identify which materials and manufacturing processes would provide the best, most cost-effective gaskets for your needs. Potential gasket materials include: Neoprene, Nitrile, EPDM, Silicone and Viton

If you're in need of custom rubber gaskets, Liangju Rubber can provide you with a premium product that is designed specifically for your applications. Liangju Rubber also offers value-added services to aid with product delivery and installation.

2. Product Parameter (Specification)

Product Name:	Custom Rubber Gaskets
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

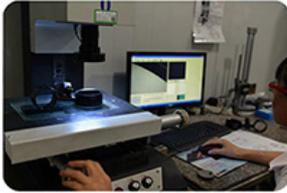

Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Electronic.
Warranty:	2years

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

Dimensional Inspection

Incoming QC

In-process QC

In-process QC

In-process QC

FQC

5. Packing, Payment and Shipping

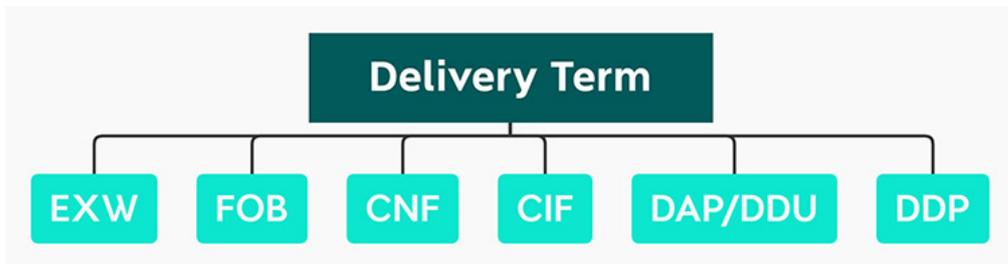

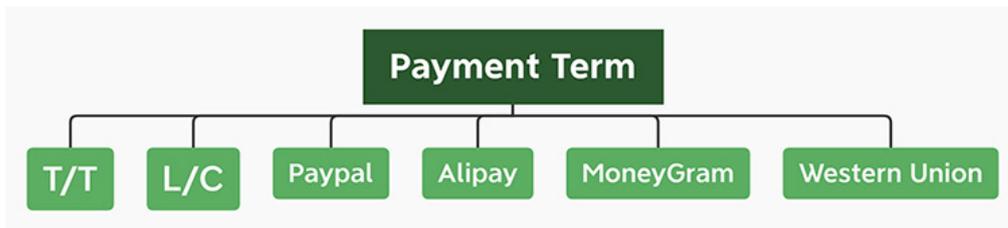

Our packing for all the Customized Shape Rubber Gaskets, strong enough to ensure its safety throughout the whole delivery no matter domestic or oversea shipping. Customized Packing/LOGO/Labeling are Available.

ISO 9001 : 2015

IATF 16949 : 2016

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
